

MICROLAN

Trace nutrient mixed fertiliser for foliar fertilisation

Microlan is a foliar fertiliser specially developed for apples and pears. It contains trace elements and a special kaolin mixture.

Microlan prevents spots on the skin (especially on Golden Delicious) that are caused by ambient humidity. In this sense, **Microlan** has a "cosmetic" function and protects the fruit against such risks and thus increases quality and reduces rejected fruit.

Microlan is very effective in asparagus. **Microlan** helps to build up the resilience of asparagus plants and ensures a longer vegetation period.

Application and dosage:

Apple, pear:

Min. 5-6 applications, every 7-8 days at a dosage of 250 g/100 litres of water.

Asparagus:

Repeat several times 2.5 kg/ha MICROLAN in combination with 2 L/ha CURAMIN (from the moment of unfolding of the leaves) with 600 liters of water.

Miscibility:

This product can be mixed with all known plant protection products, however, we recommend performing a miscibility test before using.

Packaging: 2.5 kg

Composition:

Water-soluble boron (B): 4%

Water-soluble manganese (Mn): 0.5%

Water-soluble zinc (Zn): 0.5%

Technical data:

pH in 0.25% solution: 6.8-7.2
