GREEN GRASS

Natural light-green leaf pigment with sun and heat protection

Green Grass is a liquid color concentrate that intensifies the green of lawns and plant cover. Ideal for golf courses, sports facilities, parks, and ornamental gardens. **Green Grass** provides a natural, long-lasting effect without harmful chemical residues. The plant-based formulation ensures even distribution on exposed surfaces.

Functional category:

Professional lawn coloring based on natural pigments for decorative applications.

Instructions for use:

Immediate and even coloring after application. Ideal for lawns and golf courses, even in heavily trafficked areas. Effectively covers affected areas and gives a healthy appearance.

Application and dosage:

Dilute 4-5 liters of **Green Grass** in 100 liters of water to cover an area of 500-1000 m², depending on the desired depth of color on the lawn.

Application method:

Spray with low pressure.

Frequency of use:

Under normal conditions, reapply every 3-4 weeks.

Packaging: 1 L (1 kg)

Composition:

Highly concentrated, natural pigment (plant origin), formulated for brilliant and uniform green coloring. A water-based carrier developed for optimal adhesion to plant parts for long-lasting color effect.
