

READY PLUS

Natural Plant Support

This glycerolipid-based product provides ecological protection for plants and enhances their resilience without leaving chemical residues.

Ready Plus is versatile for agriculture and horticulture.

Properties:

Ready Plus is based on natural plant extracts. As a plant strengthener, it increases the plants' resistance to adverse environmental conditions and harmful organisms.

Application and Dosage:

Vegetables (tomatoes, salads, cucumbers, pumpkins):

1.5-2.5 L/ha, in 200-800 L/ha of water, every 10-14 days

Orchard trees (apples, pears, peaches):

1.5-2.5 L/ha, in 150-600 l/ha of water, every 10-14 days

Vineyards:

1.5-2.5 L/ha, in 150-400 L/ha of water, every 10-14 days

Leafy vegetables (sugar beets, potatoes, onions, carrots):

1.5-2.5 L/ha, in 150-600 L/ha of water, every 7-10 days

Cereal crops:

1.0-1.5 L/ha, in 150-250 L/ha of water

Application instructions:

Apply **Ready Plus** with the recommended dosages in typical water volumes. Applying in the morning or evening optimizes absorption.

Compatibility:

This product can be mixed with all common plant protection products. However, the manufacturer recommends conducting a mixing test before use.

Container size: 5 L (5.5 kg)

Composition:

Product based on glycerolipids derived from the processing of vegetable oils (at least 90%).
Main components: vegetable oils, plant extracts.

Technical Data:

Specific weight at 20°C: 1.1 kg/L
