CAMPAG SCHAUMFREI

Prevents surface foam formation from mineral and plant oils

Properties and effects:

Campag Schaumfrei is an antifoam additive for spray liquids based on plant protection products. Effective against excessive foaming in the sprayer – also ideal for highly foaming substances like slurry. After use, the foam instantly loses its stability and collapses. **Campag Schaumfrei** can be used in agricultural and horticultural crops.

Usage Recommendation:

Standard dosage: 1.4 ml/100 L of spray solution.
In case of strong foaming: a few drops directly onto the foam.

Applications:

- Arable farming
- Horticulture
- Fruit growing
- Viticulture
- Ornamental plant cultivation
- Hop growing

Compatible with fertilizers, herbicides, fungicides, and insecticides.

UFI: V740-R0H5-N00G-28S0

Packaging: 1 L (1 kg)
