

MICROLAN

Trace nutrient mixed fertiliser for foliar fertilisation

Microlan is a trace element foliar fertilizer suitable for all crops. It contains trace elements as well as a special Kaolin mix. The application protects against radiation damage from UV light. This improves photosynthetic performance, protects the crop, and thus contributes to quality improvement. In asparagus cultivation, **Microlan** strengthens the asparagus' defense system and promotes a longer growth phase.

Application and dosage:

All crops:

During periods of high radiation intensity, weekly 1.0-2.5 kg/ha in 200-600 L of water.

Asparagus:

2.5 kg/ha MICROLAN in combination with 2 L/ha CURAMIN (from unfolding of the fronds) with 600 L of water, repeated several times.

Miscibility:

This product can be mixed with all known plant protection products, however, we recommend performing a miscibility test before using.

Packaging: 2.5 kg

Composition:

Kaolin

Water-soluble boron (B): 4%

Water-soluble manganese (Mn): 0.5%

Water-soluble zinc (Zn): 0.5%

Technical data:

pH in 0.25% solution: 6.8-7.2
